MODEL 1280AA

SUGGESTED SPECIFICATIONS

General: Furnish and install where indicated on drawings 12" (305mm) Acoustical Louver Model 1280AA as manufactured by Industrial Louvers, Inc., Delano, MN.

Material: Formed aluminum frames and blades shall be one piece 5005-H34 alloy. Frame shall have a material thickness of .081" (2.1mm). Fixed blades shall have a material thickness of .081" (2.1mm). The interior face of the blade shall be .032" perforated aluminum sheet. Frames and blades shall be joined by welding, and frame will be caulked to prevent water penetration to interior wall construction.

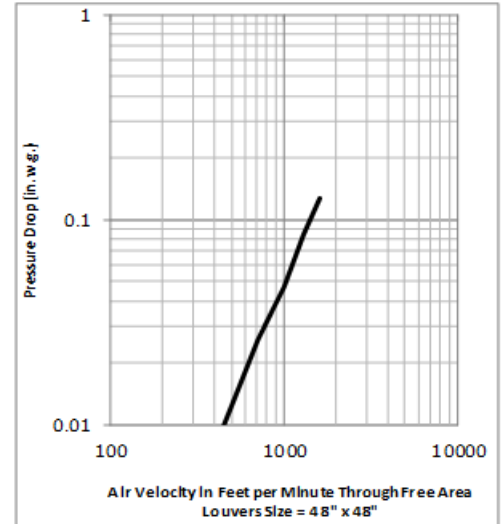

Performance

- Free area (4' x 4' louver) = 4.64 sq. ft. (29.0%)
- Free area velocity at point of beginning water penetration (.01 oz/sq. ft.) = 945.5 fpm
- Pressure drop @ 1759.3 FPM velocity = .15" water
- Air volume @ 1759.3 FPM free area velocity = 8,163.15CFM
